A WORD FROM OUR PRESIDENT

Dear partners and clients,

Eugeria's mission is to simplify the journey of the caregiver in their interventions with seniors suffering from cognitive disorders. Our mission has become all the more important given the current situation, where seniors are living moments of confinement and suffering from isolation. We are proud to offer products that can make a difference for seniors' day to day activities and provide great entertainment and stimulation. Over the last couple of months, we have added tens of new products to our catalog in order to better serve our growing clientele.

VALÉRIE LAROCHELLE,
EUGERIA'S PRESIDENT

In this new and improved version of our catalog, you will find many solutions that help alleviate the social isolation for seniors with cognitive disorders. We invite you to share it with members of your network.

Our team is always available by phone (1-855-554-3742) or by email (info@eugeria.ca) to answer your questions. We also offer to do the installation ourselves for many of the products so that they can be shipped ready-to-use to the senior.

Thank you for helping us fulfill our mission. We do the legwork of finding, vetting, and organizing solutions for you, so that you can care for your loved one.

Valérie

How do we select our products?

THE EUGERIA PROMISE

At Eugeria, we believe it is important to facilitate the caregiver's journey and to improve their loved one's daily life. This is why every single one of our products has been carefully selected.

VALIDATED AND TESTED

All of our products are tested by our team in order to understand the way they work and especially to validate the positive impact they can have in the case of cognitive disorders.

INNOVATION, DIGNITY AND UTILITY

For each of the needs associated with memory loss, we look for innovative products that combine science and technology. We select products that are useful for everyday life while respecting a person's dignity.

UNDERSTANDING THE NEEDS

Our team works closely with key stakeholders to understand the needs of people with Alzheimer's disease. We are always looking for innovative products that can improve the lives of these individuals and their families.

You have a question about a product?
You can't find a product?

CALL US AT 1-855-554-3742

*We do our best to maintain an updated version of the catalog, but prices are subject to change without notice.

STAY CLOSE TO YOUR LOVED ONE WITH FAMILÉO

NEW ARRIVAL

A family centered app particularly suitable for countering the **isolation** surrounding COVID-19.

The whole family publishes **messages and photos** of their daily lives in just a few clicks on the application or website. Every month, every two weeks or every week, Famileo formats these messages and prints them in the form of a **personalized paper journal**, sent by traditional mail to your loved one!

You can also print the newspaper yourself or ask your loved one's retirement home to do it if you want the newspaper to arrive faster. Everything is done so that families can happily share the moments of their daily lives.

First free copy with promo code
EUGERIA

To sign-up, visit eugeria.ca/en/famileo

WHAT FAMILIES SAY ABOUT FAMILÉO

“ It's very enjoyable, easy for the family. You take a picture on your cell phone, in just two clicks you are sharing, that's all. On top of that, the effect is so positive for my mother, it's great!

My mother feels closer to the whole family; the pictures we send her are beautiful moments that she can no longer experience in a long-term care facility.”

BRING JOY TO YOUR RESIDENTS, THEIR FAMILIES AND YOUR TEAMS WITH FAMILEO

1 - PERSONALIZED JOURNAL

- from families to residents

Families can share photos and messages on the Famileo application. Famileo takes care of the layout and the retirement home prints and distributes the journals to the residents.

2 - RETIREMENT HOME WALL

- from the retirement home to the families

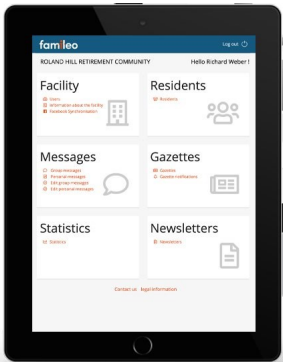

The retirement home can write messages to all families, or a message to the family of a particular resident. For the retirement home, it's very easy, they simply select the resident they want to update, and Famileo takes care of sending the message only to their family.

3 - IN-HOUSE JOURNAL

With Famileo, retirement homes can create an internal journal in a few minutes for upcoming activities, sudoku, birthdays, etc. It is printed and distributed to residents, and it can be shared electronically with families in just one click!

WHAT HEALTHCARE PROFESSIONALS HAVE TO SAY ABOUT FAMILEO

“Famileo is a really fantastic project! Eugeria contacted us this summer to take part in the pilot project. (...) It is fantastic precisely because it allows families to **communicate** with their parents in the form of journals, to recall memories, to show what they are doing at home, on a trip... with a **simple click** with their smartphone, a simple application and this is it!”

“The residents are really happy to receive their gazettes, to follow their families in their daily lives.”

“For us too, the application is **very easy to use**, there's nothing to do, we just have to open our email on Monday morning and we receive the newspapers **already edited** and we just have to print them in color.

Famileo is for us a project that came at the right time with the pandemic because it allows families to keep **meaningful connections** with their parents.”

Contact Eugeria at [1-855-554-3742](tel:1-855-554-3742) for more information on residence subscriptions.

DAILY LIFE

These products will help your loved-one in their day-to-day activities.

CHOOSING THE RIGHT ADAPTIVE PHONE FOR YOUR LOVED ONE

- Social contact is essential for the development and health of all. Opportunities to socialize tend to decrease with age, which could be due to individuals having a smaller social circle, the geographical distance of their children or the death of their spouse.
- Staying **socially active** can be a significant challenge when ageing which can lead to **feelings of loneliness and isolation**. It is essential to keep in touch with a close elder.
- The **telephone** remains the preferred option for seniors as it is simple to use, inexpensive and offers users confidence and autonomy. However, it is important to consider the **difficulties caused by hearing loss, visual loss, or cognitive decline**.

Eugeria has selected adapted phones, with big buttons, loud ringtones, programmable images for loved ones that allow the elder to use their phone as a means of communication for a longer period of time.

	Characteristics Keypad with big buttons/characters	Visual indicator for incoming calls	Photo key	Amplified ringtone	Amplified volume for incoming calls	Type of phone	Details	Price

MAKING MEALTIME EASIER

Eating and nutrition are crucial to staying healthy. The cognitive and various sensory impairments of Alzheimer's may result in a variety of feeding issues. Here are some products, such as adapted dishes and tableware, to help make mealtime easier for your loved one.

EATWELL

The Eatwell set offers tableware especially designed to let people with Alzheimer's or other related diseases eat by themselves in an independent way. They are easy to manipulate, prevent spilling, and improve nutrition.

CHARACTERISTICS :

- Contrasting colors help to distinguish food from tableware and stimulate appetite.
- The design has been adapted for people suffering from tremors or osteoarthritis.

FAMILINK

An easy and useful solution to make sure grandparents don't miss a moment of their family's lives.

\$199.90

The Familink is an easy-to-use, 3G-connected, digital photo frame. Pictures and text messages uploaded by your family instantly appear on the frame. The result is similar to a social media feed, but without the hassle of downloading an app or navigating a confusing menu. It is the ideal gift to share photos in real time with your friends and family.

EUGERIA'S TAKE

Our CEO, Valerie, is completely sold on the Familink, but her grandma loves it even more since it lets her see her great-grand-daughter grow up, even though she doesn't have Internet.

OUR HAPPY USERS' TAKE!

“It's great! My grandma loves her frame, she even said she feels like she's with the whole family when she gets pictures of our daily life. In these times of confinement and isolation for seniors, it's a gift that brightens up the days!”

AS SEEN IN

“It's a really great tool to stay in touch with an elder who doesn't have a computer or laptop.”

“Without a doubt, the top choice of our selection.”

“I bought this frame for my father who has Alzheimer's disease. He loves looking at pictures.”

JOY FOR ALL COMPANION PETS

People with dementia are more at risk of feeling lonely or isolated. Joy For All companion pet allows to break your loved one's isolation without the trouble of a real pet.

CHARACTERISTICS

- Requires 4 x 1,5V alkaline C batteries / 3 x 1.5 AA for the kitten
- Useful for people with dementia who owned a pet
- For isolated people, living alone or in a nursing home/hospital where pets are not allowed

THE CAT

- Available in 3 colors: orange tabby, silver with white mitts, and tuxedo
- Pet the back of its head or its back and it will move and purr like a real cat!

simplTM Alerts

Home or Business
Alert System

NEW ARRIVAL

SMPLTM ALERT KITS

The SMPLTM alert kits are a great new addition to the Eugeria catalog.

The kits are simple to install. They don't require wifi and they have no monthly fees.

It is no surprise that the SMPLTM alert kits are a coveted solution for caregivers living with a loved one at risk of wandering.

How does it work?

Install the sensors in key areas (front door, bedside, etc). The caregiver wears a pager on their belt. When the loved one triggers a door sensor, a motion sensor, or pushes the help button on the pendant, the pager vibrates, flashes, and beeps. Mix and match these products to get the right combination of sensors that fit your needs and home setup!

CHARACTERISTICS

- Never miss an alert with sound, vibration, and flashing wherever the caregiver is situated in and around the home.
- Low-cost solution & no monthly fees – utilizing low power consumption radio frequency technology
- Wireless – designed for easy set-up in minutes and no tools required, double-sided tape included
- Expand monitoring with up to 20 additional sensors.

Get out of bed or chair - Alert sent
